Make sure your SIM Card has a data plan to surf the internet.

Make sure your SIM Card was inserted in a right angle and properly.

FAQ

APP tips “Device offline” / “Device Power-off”?

- Weak Signal - Please check your watch's internet signal -   4G HD  - if there's only 2 - 3 bars, then it's a weak signal / unsteady signal. Please try it outside or some place with a stronger signal.
- No Signal - Please check if insert the SIM Card correctly and check if your Card has a data plan and balance. After inserting the SIM Card, it will need to restart the device and wait for 3 minutes for the signal to be connected.

Device can not be turn on?

When I received the new watch, the watch might be out of battery for a long time. At this circumstance, battery have self-protective system - will need a 5V-1A charger to charge for over 20 minutes (charging 3 - 5 minutes, indicated light would be on)

Attention: For the first time of charging, please do not charge by laptop or other weak voltage Electronic device. The device will not be charged by small power currents.
