

3.0" 1080P 4-Lens Dash Cam with Front, Rear & Side Recording

App download and installation

1. Scan the QR code on the cover. After installation, click to enter "6 frame probe", as shown in the following figure:

2. Add device

- iPhone: enter the system WiFi, select the recorder WiFi, enter the WiFi password (the default password is 12345678), connect, enter the "6-Frame probe" app and complete the addition.
- Android mobile phone: enter the "6-Frame probe" app, click "add recorder", enter the system WiFi interface according to the addition wizard, select the recorder WiFi, enter the WiFi password (the default password is 12345678), and connect. After the connection is completed, click "return" to complete the addition.

3. App function introduction

- Recorder: this page manages the recorder. You can add, view and delete the recorder, and enter the video preview interface of the recorder.
- Photo Album: manage the pictures and videos downloaded from the recorder to the mobile phone.
- More: app language settings, problem feedback, about and other information.

4. Function introduction of recorder

- Photographing: operate the recorder to take a picture, and then save the picture on the recorder.
- Zoom: enter the full video screen or exit the full video screen.
- Recorder files: enter the file list on the recorder and classify it according to circular video, photo files, emergency events and parking monitoring events.
- Recorder setting: enter the recorder setting interface to set the recording resolution and microphone switch.
 - Recorder file download - Click "recorder file" to enter the file list interface, click "select" button, select the picture or video to be downloaded, click "download" to start downloading the file. After downloading, the file is saved on the mobile phone and can be viewed through "photo album".
 - Recorder file playback - Click "recorder file" to enter the file list interface. Instead of downloading, you can directly play the video on the recorder and take photos of the current playing picture of the video;

Download: download the video to the mobile phone.

Take pictures: take pictures of the currently playing pictures and save them to the mobile phone.

5. Photo album

Enter the "photo album" to manage the pictures or videos downloaded to the mobile phone. Click "all" to enter the full list of videos in this category. The file list is arranged by date. Click "select" to select multiple files for operation.

Video: all video files.

Pictures: all picture files.

Emergency: documents of collision induction.

6. Video playback

A variety of operations can be performed on the pictures or videos in the "album", as shown below:

When playing the video in the "recorder file" or the video in the "photo album", you can choose to play at multiple speeds to quickly browse the video content or play the key video segments at a slow speed, such as "1 second 1 frame" or "10x (10 times speed)".

7. Document editing

Select the file in the "photo album" and select Edit to enter the editing interface, which supports image clipping and filter beautification; supports video clipping, music addition and other operations.
